

Our **USB Type-C to POGO PIN Cable** offers excellent charging speeds and data transfer capabilities, featuring **gold-plated POGO PINs** for a stable connection and long-lasting durability. The **N52 strong magnet** design ensures a secure and reliable connection with enhanced magnetic force, allowing for effortless attachment. The cable supports **PD fast charging**, delivering fast and stable charging to compatible devices, especially for **POS systems, iPads**, and other tablets. It is also perfect for use in [POGO PIN charging stations](#).

The included **POGO PIN female connector** ensures seamless connection to other devices or as a primary interface in charging stations. This high-performance charging cable is widely used in the retail industry and mobile payment terminals, making it the ideal choice for businesses requiring efficient charging and data transfer solutions.

For more information, check out our Tablet Charging station and PoE to [USB Type C Hub](#) for additional product details and use cases.
