

Designed for Steam Deck & Gaming Handhelds

This Steam Deck-compatible 11-in-1 **USB-C Docking Station** is built for performance. Made from durable CNC aluminum alloy, this dock is precision engineered for handheld gaming consoles requiring multifunctional connectivity, cooling, and power support.

All-in-One Connectivity

It features HDMI 2.0, DisplayPort 1.2, and VGA for flexible video expansion. Stream or mirror gameplay up to 4K@60Hz to external monitors or TVs. The dock also provides Gigabit Ethernet, USB 3.0 ×3, USB 2.0 ×3, and PD 3.0 (100W) for charging during gameplay.

Dual Fan Cooling System

Unlike traditional docks, this model includes two built-in cooling fans to reduce device heat, extending the hardware's lifespan and enhancing performance during long sessions.

MST Multi-Screen Mode & Independent EDID

Supports MST (Multi-Stream Transport) for multi-display configurations and advanced EDID handling - ideal for streamers, multitaskers, and developers.

Built for Professionals & Resellers

With full **OEM/ODM customization support**, this product is suitable for B2B distributors, eCommerce brands, wholesalers, and gaming accessory vendors looking to source high-end Steam Deck accessories directly from a trusted factory in China.
