

The 220W 6-Port GaN Charging Station is engineered to meet the demanding needs of high-power users and businesses. Whether you're powering multiple laptops in a conference room or managing an office's mobile devices, this **charging hub** delivers seamless performance with enhanced safety and broad compatibility.

Powered by the latest Gallium Nitride (GaN) technology, this charging station provides higher energy efficiency, lower heat output, and faster charging speeds compared to conventional silicon-based chargers like the common **100W USB-C Charger**. It's an excellent upgrade for users who require multi-device support without compromising speed or safety.

With 4 USB-C and 2 USB-A ports, this 6-Port Desktop USB Charging Hub is compatible with USB PD3.0, QC3.0, PPS, FCP, and AFC protocols—ensuring it works perfectly with leading brands such as Apple, Samsung, Huawei, Lenovo, and Dell. Ideal for charging laptops, tablets, and smartphones simultaneously, the charger intelligently allocates power based on the connected devices' needs.

A built-in U-shaped support stand provides solid desk placement, while custom-designed ventilation channels help maintain optimal temperature, even during continuous high-power charging. Whether in the office, co-working space, or tech-savvy home setup, this charger ensures long-lasting reliability and performance.
