

Efficient Multi-Device Charging

Our **multiport USB Charging Station** is engineered to provide efficient and simultaneous charging for various devices. Equipped with 4 USB-A ports, 2 USB-C ports, and 2 AC outlets, this charging hub is ideal for commercial applications such as office environments, hotels, conference rooms, and educational institutions. Its compact design ensures efficient space utilization, while the integrated AC outlets provide versatility for various devices.

Dual AC Outlets for Versatility

This charging station supports Power Delivery (PD) and Quick Charge (QC) protocols, delivering optimal charging speeds to devices like smartphones, tablets, laptops, and wearables. The USB-C ports offer up to 20W fast charging, while the USB-A ports provide up to 18W, ensuring efficient power distribution.

Advanced Safety Features

The charging hub is built with multiple safety protections, including over-voltage, over-current, short-circuit, and over-temperature safeguards, ensuring the safety of both devices and users during operation.

Wide Compatibility

Designed to be universally compatible, this charging station supports a wide range of devices, making it a versatile solution for various charging needs in commercial settings. Whether it's for multi-device charging stations, **USB charging docks**, or desktop power strips, this product meets the diverse requirements of modern workplaces.
