

Product Description

The [magnetic pogo pin rotatable charging stand](#) is engineered for devices requiring high durability, effortless docking, and stable power transmission. Its magnetic alignment system allows users to snap the device into place instantly, while the spring-loaded pogo pins maintain consistent contact even during movement. The 360° rotatable head supports flexible viewing angles and optimized user convenience, making it ideal for smart scanners, wearable devices, medical handheld terminals, industrial controllers, and custom charging stations.

Designed and manufactured in-house, we provide complete OEM/ODM services including structural design, circuit integration, injection molding, CNC machining, and custom cable assemblies. With experienced R&D engineers and advanced production facilities, we help customers bring high-quality magnetic charging solutions from concept to mass production efficiently.

Usage Scenarios

- Handheld smart devices
- Wearable devices (watches, bands)
- Industrial data terminals
- Medical handheld equipment
- Smart home products
- Charging display stands
- Multi-device docking stations

The [rotatable charging dock](#) offers fast, stable, and effortless docking for smart devices and handheld equipment. Its strong magnetic alignment and gold-plated pogo pins ensure reliable charging, while the 360° rotatable head provides flexible viewing and easy operation. Designed for durability and daily use, it is an ideal solution for wearable devices, industrial terminals, and custom charging applications.
