

The Adjustable POS Terminal Card Reader Holder is an essential accessory for modern payment systems. It features a universal fit that accommodates most card readers, with silicone grip pads to prevent scratches and ensure a secure hold. The bolt-down base ensures stability during usage, making it ideal for high-traffic environments.

The integrated cable management system allows you to neatly hide and organize cables inside the pole, ensuring a tidy and professional appearance. Its adjustable design offers 180-degree rotation, allowing users to position the card reader for optimal convenience during transactions.

Perfect for retail stores, restaurants, and healthcare facilities, this card reader holder enhances user experience by providing a stable and ergonomic solution for payment terminals. Its durable metal construction ensures long-lasting use, making it a reliable choice for any business.
