

Product Description

The **Anti-Theft Mobile Phone Charging Display Stand** is designed for secure retail display environments such as **mobile phone shops, shopping malls, showrooms, and exhibitions**. It allows customers to freely handle the device while keeping it charged and securely attached.

Key Features

- **Intelligent Alarm System** — Built-in motion and cable disconnection detection triggers a loud alarm (90-120dB).
- **Simultaneous Charging and Security** — The coiled cable supports both fast charging and anti-theft connection.
- **Universal Compatibility** — Compatible with Type-C, Micro USB, and Lightning connectors.
- **Remote Control Operation** — Simple management of alarm settings and sensitivity via wireless remote.
- **Elegant Display Design** — Sleek ABS and aluminum alloy structure enhances professional retail presentation.
- **Manufacturer Direct Supply** — Produced by an ISO13485 and ISO9001 certified manufacturer with strong R&D capability for security display systems.

Applications

- Mobile phone stores and retail chains
- Consumer electronics showrooms
- Trade exhibitions and demo displays
- Device display counters for tablets and handheld terminals

OEM/ODM Customization

We provide complete customization for:

- Cable type (Type-C / Lightning / Micro USB)
- Alarm sensitivity and power mode

- Stand shape and color
- Branding logo or private label

Our R&D team ensures flexible design solutions that meet different retail and industrial security display needs.

This [**mobile phone alarm stand**](#) combines secure protection and fast charging in one sleek design. Ideal for retail stores and exhibitions, it features a built-in alarm system, remote control, and universal charging connectors (Type-C, Micro USB, Lightning).
