

## Reliable 12V PoweredUSB Cable for Seamless Power and Data Connectivity

Our 3-meter **12V PoweredUSB Cable** is engineered to meet the demands of industries requiring both power and data transfer through a single cable. It integrates a **12V locking PoweredUSB connector**, a **USB-B interface**, and a **5-pin DIN plug**, making it highly versatile for use in POS systems, medical diagnostic devices, and self-service kiosks.

### Key Features:

#### 1. Dual Functionality

- Combines power (12V, up to 6A) and data transfer in one cable, minimizing clutter and simplifying device connectivity.

## 2. POS System Integration

- Perfect for **receipt printers, barcode scanners, and payment terminals**, ensuring seamless operation in retail environments.

## 3. Medical Equipment Compatibility

- Designed for **diagnostic devices, patient monitoring systems**, and other healthcare instruments requiring reliable power and communication.

## 4. Secure Locking Mechanism

- The 12V green PoweredUSB connector features a locking design, ensuring a stable and secure connection even in demanding industrial or medical settings.

## 5. High-Quality and Durable Construction

- Manufactured with a durable **PVC jacket**, offering flexibility, abrasion resistance, and longevity in both stationary and mobile applications.

## 6. Customizable Solutions

- Cable length, connector type, and specifications can be tailored to meet your unique project requirements.

### Applications:

- **POS Systems:** Receipt printers, barcode scanners, and card payment terminals.
- **Medical Devices:** ECG machines, diagnostic instruments, and patient monitoring systems.
- **Self-Service Terminals:** Kiosks, ticketing machines, and vending systems.
- **Industrial Automation:** Equipment requiring stable power and data transfer.

### Certifications and Quality Assurance:

Compliant with **RoHS**, **CE**, **ISO 9001**, and **ISO 13485**, ensuring safety, quality, and reliability.
