

# Industrial-Grade Construction for High-Traffic Environments

This [metal POS swivel stand](#) is engineered for secure and ergonomic installation of POS systems and payment terminals in retail counters, restaurants, supermarkets, hotels, and kiosks.

The 360-degree rotatable base allows easy switching between cashier and customer operation, improving checkout efficiency and user experience. The freely adjustable tilt mechanism enables optimal screen visibility and touch interaction for different users and environments.

Manufactured with high-strength metal materials and a solid weighted base, the stand provides excellent stability and durability even in high-traffic environments.

We support full customization including:

- Structural and mechanical design
- Terminal compatibility (WIZARPOS, Ingenico, Verifone, PAX, SUNMI, etc.)
- Custom dimensions, hole positions, and mounting interfaces
- Custom colors, coatings, and surface treatments
- Logo engraving, private labeling, and packaging

All products are designed and produced in-house under ISO 9001 certified quality management systems to ensure consistent quality, reliability, and traceability.

---

## Typical Applications

- Retail [POS](#) counters
- Restaurants and cafés
- Supermarkets and convenience stores
- Hotels and hospitality front desks
- Self-service kiosks

- Payment and transaction terminals
- 

## **Manufacturer Advantages**

- In-house R&D and mechanical engineering team
- Fast prototyping and sampling
- ISO 9001 certified factory
- Full OEM / ODM customization capability
- Stable quality and competitive factory pricing
- Experience with global POS brands
