

Product Description

Ergonomic Dual Monitor Support

Our [adjustable monitor stand](#) allows users to freely position two monitors for optimal comfort and productivity. Smooth, counterbalanced gas-spring movement ensures precise adjustment without manual tightening.

High-Strength Industrial Construction

Made from durable aluminum alloy and engineered for stability, the [dual display desk stand](#) maintains long-term performance even under continuous daily adjustments. Each joint is rigorously tested to ensure consistent tension and strength.

Flexible, Full-Range Motion

- **360° rotation** for horizontal or vertical monitor placement
- **±90° swivel** for multi-directional viewing
- **+35°/-35° tilt** for ergonomic adjustment
- **Gas-spring height adjustment** for effortless movement

Space-Saving & Clean Desk Setup

The dual-arm design elevates both monitors above the desk surface, leaving more workspace for laptops and documents. The integrated **cable management channels** keep the workspace organized and free of clutter.

Designed for Heavy Monitors

Supports monitors up to **9 kg per arm**, suitable for widescreen displays, ultrawide monitors, and touchscreen panels. Load capacity can be customized according to project needs.

Ideal for Multi-Screen Work Environments

Perfect for:

- Corporate offices
- Control centers
- IT/Programmers

- Graphic designers
- Trading desks
- Medical workstations

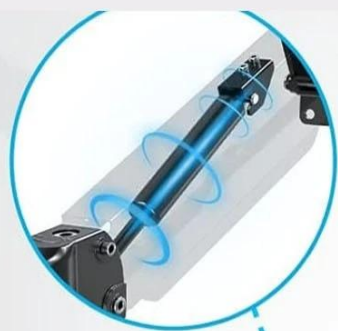

Direct Manufacturer Advantage — OEM/ODM Specialist

As a professional **monitor arm manufacturer**, we offer:

- **Private mold development**
- Structural optimization and CAD design
- Custom gas-spring strength
- Custom arm length and rotating joints
- Brand logo printing & packaging design
- Mass production with strict QC standards

We support **small batch prototyping** and **high-volume production** with fast turnaround.
