

## Product Description

The **Foldable Desktop Docking Station for iPhone 15** is an all-in-one expansion hub that brings desktop-level functionality to your smartphone. With **4K HDMI projection**, it supports clear, ultra-high-definition video output to monitors or TVs. Multiple **USB-A and Type-C ports** allow simultaneous data transfer and peripheral connections, while **SD/TF card slots** make media file access quick and convenient.

The **foldable stand design** ensures ergonomic viewing and easy portability, making it ideal for both professional workspaces and home entertainment setups.

As an experienced **USB-C hub and docking station manufacturer**, we provide complete **OEM/ODM customization services** — from circuit design and PCB layout to mold development and final assembly — under strict **ISO9001-certified quality management**.

### Key Advantages:

- High-speed data transmission and 4K video output.
- Compact, foldable, and ergonomic design for desktop use.
- PD fast charging with stable performance.
- Professional OEM/ODM customization with R&D support.
- Certified quality factory with global supply capability.

---

## Why Choose Us

- **ISO9001 Certified Factory** ensuring strict quality management.
- **Strong R&D Capability** for circuit design and structural innovation.
- **OEM/ODM Customization** for brand-specific designs and features.
- **Fast Prototyping to Mass Production** for global partners.
- **Comprehensive Testing & Quality Control** for performance and durability.

# SUPER-SPEED DATA TRANSFER RATES

Features USB 3.0 up to 5Gbps for quick access to essential peripherals
