

Product feature

This compact and robust **USB-C hub** is designed for industrial and commercial applications requiring simultaneous data transfer, power delivery, and multiple accessory connections. Featuring an **RJ45 Gigabit Ethernet port**, **USB-C power input**, **dedicated USB-C tablet interface**, and **dual accessory USB-C ports**, this hub provides a reliable all-in-one solution for integrating tablets or embedded systems into high-performance environments.

This **Type-C Ethernet hub** is especially suited for systems that must maintain strong, reliable connections between the central device (like a tablet or board computer) and external modules such as scanners, printers, and sensors.

Key Features

- **Ethernet Connectivity:** Built-in Gigabit Ethernet port for fast, stable network access.
- **USB-C Power Input:** Supports USB Power Delivery (PD), ensuring sufficient power for tablets or other connected devices.
- **Tablet Integration Port:** Dedicated USB-C port for seamless communication with tablets or embedded PCs.
- **Dual Accessory Ports:** Two USB-C ports for external peripherals such as barcode scanners, card readers, or touch displays.
- **Industrial-Grade Design:** Durable housing with integrated mounting flanges for fixed installation in kiosks, carts, or dashboards.
- **Plug-and-Play:** No drivers required for most OS platforms including Android, Windows, and Linux.
