

# Industrial-Grade Construction for High-Traffic Environments

This **adjustable kiosk POS tablet stand** is specifically engineered for **high-traffic commercial and retail environments**. The **all-metal construction** provides superior stability, durability, and load-bearing capacity compared with plastic tablet stands, ensuring reliable performance during continuous daily operation.

As a professional **POS stand manufacturer and factory in China**, Goochain designs this stand for long-term commercial deployment.

## Modular & Universal POS Mounting Design

The modular architecture allows multiple POS devices to be integrated into a single workstation, including:

- POS displays or tablets
- Payment terminals and card readers
- Barcode scanners
- Thermal receipt printers

With **universal mounting plates** and **VESA compatibility**, the stand supports seamless integration with mainstream POS hardware brands, making it ideal for system integrators and solution providers.

## Manufacturer Advantage - **OEM, ODM** & R&D Capability

As a direct **POS stand manufacturer, supplier, and OEM/ODM vendor based in Shenzhen and Dongguan, China**, Goochain provides full manufacturing support, including:

- In-house structural and mechanical design
- Rapid prototyping and functional validation
- Custom mounting plates for specific POS devices
- Stable mass production with strict quality control

This makes our POS stands ideal for **POS solution providers, system integrators, distributors, and brand owners**.

# Why Choose Goochain as Your POS Stand Supplier

- **Strong R&D Capability** - Structural optimization and thermal design
- **ISO 9001 Certified Factory** - Stable and traceable quality management
- **OEM / ODM Experience** - From concept design to mass production
- **Strict QC Process** - Incoming material inspection, in-process control, and final inspection
- **China Factory Advantage** - Competitive pricing and fast lead time from Shenzhen & Dongguan

# Mounting options

## Option 1:

Stick rubber pads to the metal plate of the base.

## Option 2:

Use round EVA sticker to stick the metal plate to the desktop.

## Option 3:

Drill 4 holes in the mounting surface and fix the iPad stand with 4 provided screws.
