

360 Degrees Rotating POS Machine Stand - Built for Heavy-Duty Commercial Use

This professional-grade POS terminal stand is engineered for retailers and merchants who demand durability, flexibility, and a clean cashier environment. Made from high-strength steel, it securely holds your payment terminal while enabling smooth 360° rotation and tilt adjustment for customer-facing or cashier-facing use.

Key Features

360° Rotatable for Multi-Direction Viewing

The POS stand rotates freely in all directions, allowing cashiers and customers to adjust the payment terminal instantly without lifting or repositioning the machine.

Adjustable Width (62-95 mm)

The clamp distance can be easily adjusted to fit most POS models on the market, such as card readers, QR code payment devices, and handheld POS terminals.

Secure Locking & Non-Slip Design

Four anti-slip clamps firmly hold the POS machine in place, preventing drops or shaking during use. The tightening screws offer extra stability for busy counters.

Tilt-Adjustable for Ergonomic Operation

The display angle can be changed to enhance viewing comfort, suitable for quick-service environments and high-traffic cashier stations.

Heavy-Duty Base with Screw Mount

The 100mm wide base ensures a firm installation on cashier counters, preventing movement during card swiping or tapping.

Ideal for All Commercial Environments

Perfect for supermarkets, retail stores, pharmacies, convenience stores, restaurants, hotels, and any POS checkout system.

OEM / ODM Support

Goochain provides full customization including:
