

Our **OEM Adjustable POS Terminal Stand** is designed for high-traffic commercial environments where stability, security, and user flexibility are critical. Crafted from reinforced ABS with a robust internal structure, this mount securely holds your credit card reader or payment terminal in place, even during constant use.

This POS display stand provides full **360-degree swivel** and **multi-angle vertical tilt**, giving your customers and staff better ergonomic access and improving transaction efficiency. The anti-theft design prevents easy removal of the terminal, and two installation methods allow for maximum versatility:

- **3M adhesive pad:** Tool-free, ideal for temporary setups, tradeshow booths, or smooth countertop installations.
- **Screw-through base:** Provides secure, permanent mounting for high-security environments.

Perfect for retailers, restaurants, banks, and self-service kiosks, the PS-S03 adapts to nearly any POS machine through OEM design support.

Customization Options:

We offer complete OEM/ODM services, including logo printing, color matching, bracket adaptation for custom terminal sizes, and packaging. Backed by our professional design & R&D team, we ensure fast turnaround and tailored solutions.
