

## Product Feature

### Efficient Heat Dissipation

The [hollowed aluminum structure](#) promotes natural airflow, allowing heat to dissipate faster from the bottom of the Mac mini, improving long-term performance stability.

### Premium Aluminum Alloy

Manufactured from **high-strength aluminum alloy**, offering excellent thermal conductivity, durability, and a premium appearance suitable for professional environments.

### Precision Fit for Mac mini

This [Mac mini heat dissipation stand](#) engineered to match the **Mac mini M4 / M4 Pro footprint**, ensuring stable placement without blocking ports or vents.

### Minimalist & Professional Design

Sleek industrial styling complements Apple products and modern workspaces, ideal for offices, studios, and commercial environments.

### Manufacturer Customization Capability

- Custom dimensions & structures
- CNC machining & mold development
- Logo engraving (laser / CNC)
- Custom colors & surface finishes
- Retail or bulk packaging design

---

## Applications

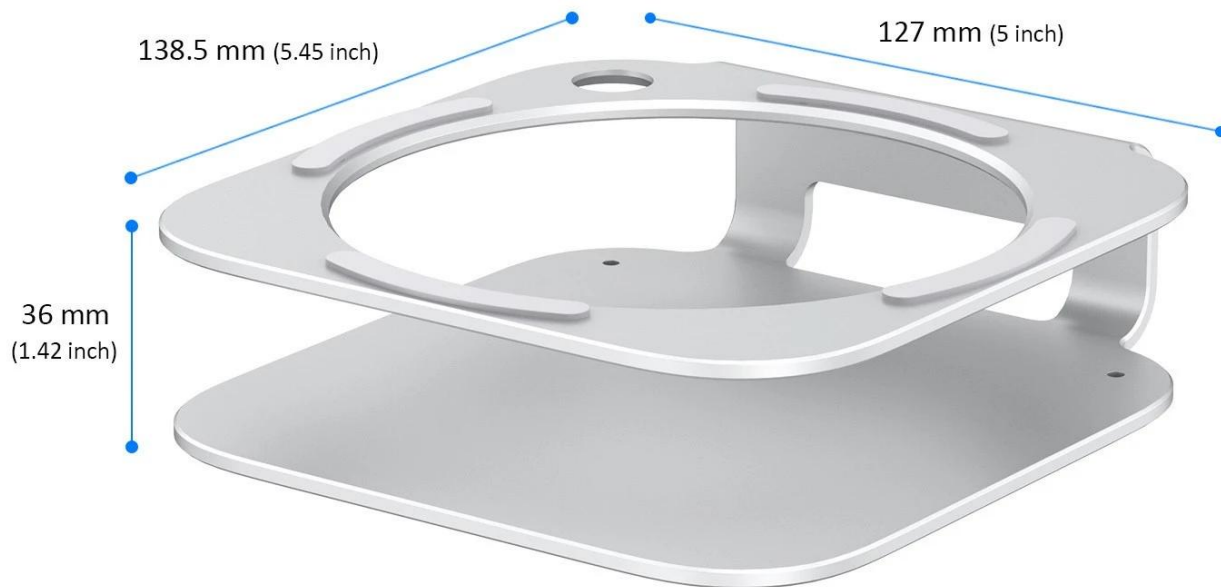

- Office desktop setups
- Creative studios & design workstations
- IT deployment & enterprise environments

- Retail display & demo systems
  - Industrial or commercial Mac mini installations
- 

## Why Choose Us

- **Strong R&D Capability** - Structural optimization & thermal design
- **ISO 9001 Certified Factory** - Stable quality management
- **OEM / ODM Experience** - From concept to mass production
- **Strict QC Process** - Incoming material, in-process, and final inspection

Weight: **189.7 g**

Aluminum alloy thickness: **3 mm (0.118 inch)**
