Tablet Case for 10.9″ iPad with Card Reader – Magnetic Pogo-Pin Design

This **tablet case** is specially engineered for the 10.9-inch iPad and integrates a detachable card reader module through a magnetic pogo-pin interface. Designed for retail, hospitality, and POS applications, it provides stable connectivity, strong protection, and flexible modular functionality to support modern payment workflows.

Key Features:

1. **Magnetic Pogo-Pin Connection:** Ensures added security in public or commercial spaces,

preventing unauthorized removal of the tablet.

2. **Detachable Modular Back Plate:** The back module snaps into place magnetically and can be secured with screws, allowing quick installation or replacement of card readers or accessories.

3. **Perfect Fit for 10.9″ iPad:** Precisely molded to support the 10.9-inch iPad (iPad 10th/11th Gen, iPad Air), ensuring a secure fit and full protection for commercial use.

4. **Durable Industrial-Grade Materials:** Made with reinforced engineering plastic and metal inserts, offering strong resistance to impacts, scratches, and long-term daily operation.

5. **Easy Service & Maintenance:** Card reader module can be removed or replaced within seconds, helping reduce downtime and simplifying field service.

6. **Professional POS Appearance:**Clean, modern, industrial-grade design suitable for retail stores, restaurants, kiosks, and mobile checkout setups.

Applications:

- Retail checkout counters

- Restaurant POS terminals

- Mobile payment devices

- Self-service kiosks

- Event & exhibition POS

- Hotel & hospitality service stations

Advantages

- Reduced cable usage with pogo-pin design

- Rapid module replacement and service

- Strong durability for high-traffic commercial environments

- Clean and professional POS presentation

- OEM/ODM customization supported for large-volume projects
