Product feature

This **USB-C to RJ45 Gigabit Ethernet Adapter** with USB-C PD passthrough is designed to meet the rigorous demands of commercial, medical, and industrial systems. With support for 10/100/1000Mbps network speeds and up to 100W power delivery via the USB-C port, it's an ideal connectivity solution for laptops, tablets, embedded computers, and healthcare equipment requiring stable wired networking and simultaneous charging.

Key Features:

- **High-Speed Ethernet**: Supports stable Gigabit networking (1000Mbps) for data-intensive tasks.

- **Power Delivery Passthrough**: USB-C PD up to 100W to charge your host device while in use.

- **Durable Design**: Premium aluminum alloy casing improves durability and electromagnetic shielding.

- **Cross-Platform Compatibility**: Works with Windows, macOS, Android, and Linux.

- **Medical & Industrial Grade Manufacturing**: Manufactured under ISO 13485 and ISO 9001 certified processes for guaranteed quality and reliability.

- **Customizable Design**: OEM/ODM services available – branding, cable length, housing color, and chipset options.

Whether you're a healthcare device developer or an industrial system integrator, our **USB-C to Ethernet Adapter** offers the perfect balance of performance and reliability with complete manufacturing support.
