

Product Feature

This [adjustable POS terminal stand](#) is engineered for **high-traffic commercial environments**. The **all-metal structure** ensures superior stability and load-bearing capacity compared with plastic POS stands, making it suitable for **continuous daily operation**.

Modular & Universal Design

The pole-mounted architecture allows multiple devices to be installed on a single stand, including:

- POS displays or tablets
- Payment terminals & card readers
- Barcode scanners
- Thermal receipt printers

Its **universal mounting plates and VESA support** enable seamless integration with mainstream POS hardware brands.

Ergonomic & Space-Efficient

With **swivel, tilt, and height adjustment**, operators can easily position each device for optimal viewing and operation. The **vertical layout reduces countertop clutter**, improving workflow efficiency at checkout counters.

Manufacturer Advantage - OEM & R&D Capability

As a **professional [POS stand](#) manufacturer**, we provide:

- In-house structural & mechanical design
- Rapid prototyping & sample validation
- Custom mounting plates for specific devices
- Mass production with consistent quality control

This makes the stand ideal for **system integrators, POS solution providers, and brand owners**.

Applications

- Retail POS counters
 - Supermarkets & convenience stores
 - Restaurants & cafés
 - Hotels & hospitality front desks
 - Self-service payment stations
-

Why Choose Us
